2 CORE TEACHING FACULTY

Prof. dr. Dennis Bams	w.bams@maastrichtuniversity.nl
Drs. Ton van Bree RA	a.vanbree@maastrichtuniversity.nl
Prof. dr. Harold Hassink	h.hassink@maastrichtuniversity.nl
Dr. Roger Otten	r.otten@maastrichtuniversity.nl
Dr. Paulo Rodrigues	p.rodrigues@maastrichtuniversity.nl
Prof. dr. Philip Vergauwen	philip.vergauwen@maastrichtuniversity.nl

Short profiles of the core teaching faculty and guest speakers are provided in the sections 9 and 10 of this course syllabus.

3

COURSE DESCRIPTION

This integrated module provides MBA participants with a comprehensive foundation in corporate finance, accounting, performance management, enterprise risk management, compliance, and sustainability reporting. Together, these disciplines enable managers to make informed financial decisions, evaluate organisational performance, manage uncertainty, and create sustainable long-term value for a broad range of stakeholders.

The central theme of the course is financial leadership: how managers use financial information, analytical tools, risk awareness, and performance management to support strategic decision-making in increasingly complex organisational environments.

The module combines academic insights with practical applications through a balanced mix of recognised faculty members, experienced practitioners, guest speakers and real-world case studies.

The course is built around four core building blocks:

1. Financial Management

This section introduces the principles of corporate financial decision-making. Participants explore investment appraisal, company valuation, capital structure, financing decisions, financial risk management, and the interaction between corporations and financial markets. Particular attention is given to balancing risk and return while creating sustainable long-term value.

2. Financial Accounting and Analysis

This section develops participants' ability to interpret and evaluate financial information. Topics include financial statements, accounting principles, performance measurement, financial ratios, IFRS, and the use of accounting information to support managerial and strategic decisions.

3. Management Accounting and Control

This section examines how organisations design management control systems to improve performance and support strategy execution. Participants explore cost management, budgeting, performance measurement, planning and control systems, and the evolving role of controllers as strategic business partners.

4. Enterprise Risk Management

Organisations increasingly operate in volatile, uncertain and highly regulated environments. This section introduces Enterprise Risk Management (ERM) as an integrated approach to identifying, assessing and managing strategic, operational, financial, compliance and ESG-related risks. Participants learn how effective risk management strengthens decision-making, organisational resilience and long-term value creation.

Building upon these foundations, the course addresses two complementary areas that have become indispensable for modern financial leadership.

5. Compliance

Compliance focuses on ensuring that organisations operate within legal, regulatory and ethical boundaries. Participants examine compliance risk, governance mechanisms, internal control systems, anti-corruption, data protection, financial regulation and organizational integrity. Rather than viewing compliance solely as a legal obligation, the course presents it as a strategic capability that strengthens trust, reputation and organisational performance.

6. Sustainability Reporting

Financial performance can no longer be evaluated independently from environmental, social and governance (ESG) considerations. This section introduces the principles and practice of sustainability reporting, including the GRI Standards, ISSB standards and the European Corporate Sustainability Reporting Directive (CSRD). Participants examine materiality, assurance, stakeholder expectations and integrated reporting, and learn how sustainability reporting contributes to transparency, accountability and long-term value creation.

Throughout the module, *Governance* is addressed as a cross-cutting principle rather than as a separate discipline. Effective governance underpins sound financial decision-making, enterprise risk management, compliance, performance management and sustainability reporting, enabling organisations to balance the interests of shareholders and wider stakeholder groups.

Together, these topics reflect the competencies expected from contemporary business leaders. Upon completion of the module, participants will understand how financial analysis, accounting information, performance management, enterprise risk management, compliance and sustainability reporting jointly support effective strategic decision-making and responsible organisational leadership.

Organisational visit and guest speakers

As part of the module, participants will visit the Limburg Regional Police Unit to explore financial management, operational control and decision-making within the public sector. In addition, the former CFO of DSM Asia will share practical insights into financial leadership, international business, strategic decision-making and leading finance functions in a global corporate environment.

These experiences bridge theory and practice by exposing participants to diverse organisational settings and demonstrating how financial leadership principles are applied across both public and private organisations.

4

LEARNING GOALS

This integrated module is designed to equip MBA participants with a solid foundation in the financial, accounting, and governance dimensions of modern business. Upon completion, participants will be able to:

1. Understand core financial decision-making processes within corporations, including investment, financing, and risk management decisions, and how these decisions interact;
2. Interpret and apply accounting information, both financial and managerial, for performance evaluation, control, and strategic decision-making;
3. Evaluate how organisational control, enterprise risk management and compliance contribute to responsible financial decision-making, accountability and long-term value creation.
4. Identify and assess key enterprise risks, and apply integrated risk management frameworks to align risk appetite with strategic objectives;
5. Understand the role of compliance and regulation in responsible business conduct and risk mitigation;
6. Analyse and interpret sustainability and ESG reporting frameworks, and assess their role in corporate transparency, stakeholder engagement, and long-term value creation;
7. Integrate financial, accounting, performance management, risk, compliance and sustainability reporting insights into a holistic understanding of how organizations create and protect value.

Component-Specific Learning Outcomes

Financial Management	Participants will: • Understand how investment and financing decisions are made in practice; • Analyse how financing choices affect investment decisions and vice versa; • Interpret the role of financial markets and investor expectations; • Apply key financial concepts such as discounting, risk-return trade-offs, and diversification; • Explore contemporary developments such as financial risk management and the use of derivatives.
Financial Accounting and Analysis	• Understand and interpret core financial statements; • Apply core accounting principles such as accrual accounting, matching, and revenue recognition; • Use key performance indicators (e.g., EBITDA) in financial analysis; • Compare and navigate global accounting standards (e.g., IFRS vs. US GAAP);

	Evaluate financial data for strategic and managerial decision-making.
Management Accounting and Control	- Understand the role of managerial accounting in decision-making and control; - Apply cost systems and performance measurement tools in various business contexts; - Balance the use of information for decision support versus behavioural control; - Explore the evolving role of controllers as internal consultants or business partners;
Enterprise Risk Management	- Understand the principles of enterprise risk management and the COSO-ERM framework; - Identify and categorize strategic, operational, reporting, compliance, and ESG-related risks; - Align risk management practices with corporate objectives and risk appetite; - Examine how risk management contributes to governance, performance, and resilience; - Apply real-world ERM practices through case analysis and discussion; - Understand how governance structures support effective risk oversight and strategic decision-making.
Compliance	- Diagnose compliance challenges in real-world cases - Understand the concept of compliance risk and its significance across industries; - Recognize legal, regulatory, and ethical obligations in a business context; - Evaluate the effectiveness of compliance programs and internal controls; - Explore the influence of culture, leadership, and behaviour on compliance outcomes; - View compliance not only as a legal necessity but as a strategic asset for reputation and trust; - Recognise the role of governance, culture and leadership in fostering ethical organisational behaviour.
Sustainability Reporting	- Understand the connection between ESG risks, compliance, performance, and disclosure; - Recognize major sustainability reporting standards (e.g., GRI, ISSB, CSRD); - Evaluate non-financial disclosures on climate impact, diversity, human rights, and governance; - Explore the principles of materiality, assurance, and stakeholder relevance; - Appreciate the strategic role of sustainability reporting in value creation and corporate legitimacy.

In doing so, the course contributes to the development of key competencies as defined by the Dublin Descriptors. The table below specifies how these general learning objectives are contextualized within the scope of this module, and how they are operationalised through the corresponding assessment method.

Learning goals (Dublin Descriptor)	General learning objectives	Learning objective fine-tuned to the course	Assessment method
Knowledge & Understanding	Understand core financial decision-making processes within corporations, and how these decisions interact.	Understand the principles of corporate finance, financial and management accounting, enterprise risk management, compliance, and sustainability reporting, and explain how these disciplines jointly support strategic decision-making and long-term value creation.	Problem-based company assignment that integrates corporate finance, financial and management accounting, enterprise risk management, compliance, and sustainability reporting to formulate well-supported managerial recommendations.
Application of Knowledge	Interpret and apply key financial and non-financial information for decision-making in different settings.	Analyse organisational challenges using financial information, management accounting tools, risk management frameworks, compliance principles, and sustainability reporting practices to develop evidence-based managerial recommendations.	
Judgment	Critically evaluate financial decision-making, accounting, governance, and risk management practices. Take into account and balance the interests of all stakeholders.	Critically evaluate financial decisions, organisational control systems, enterprise risk management practices, compliance programmes, and sustainability disclosures, while balancing the interests of shareholders and a broader range of stakeholders.	
Communication	Discuss your own findings. Convince company management and other stakeholders.	Communicate financial analyses, risk assessments, and managerial recommendations clearly and persuasively to both financial and non-financial stakeholders, using appropriate evidence and professional reasoning.	
Self-direction	Identify your own knowledge gaps. Obtain a holistic understanding of how organisations create and protect value for all stakeholders in a dynamic environment.	Reflect critically on your own analytical capabilities and continue developing the interdisciplinary knowledge required for effective financial leadership, responsible decision-making, and organisational resilience.	

5 TIME SCHEDULE

Please note that topics and speakers listed in the time schedule are provisional and may be subject to minor changes.

Session	Topic	Lecturer	location
Monday 7-09-2026

7

COURSE ASSIGNMENTS

There is no **pre-assignment** for this course, except from the expectation that all students carefully prepare the assigned literature for each session in advance.

The module concludes with an integrated **individual final assignment** based on a central real-life case, which will be announced on Canvas in due time. Each core faculty member will formulate one question related to their area of expertise—potentially including sub-questions or optional components—and will be responsible for evaluating your responses to their own question. Students will be required to select and answer three questions out of four, subject to specific restrictions that will be communicated at the start of the assignment period. Each selected question is graded separately, and carries an equal weight in the final grade.

Further details regarding the case and set of questions will be made available on Canvas in due time.

Assessment Criteria Per Question (=100% of Total Grade)	Weight
Criterion 1: Content – Quality of the solution to the case, including clarity and depth of argumentation and analysis; effective application of course literature; appropriate use of additional sources; and effective use of figures, tables, and appendices.	75%
Criterion 2: Critical Reflection – Demonstrated ability to reflect critically on key choices, assumptions, and limitations of the analysis and recommendations. Also includes the quality of documentation and thoughtful reflection on the use of AI.	15%
Criterion 3: Form – Structure, writing style (clear, well-organized, concise, and engaging), correct grammar and spelling, and formatting (including page numbers and an APA-style reference list at the end of each answer, where applicable).	10%

The assignment must be submitted no later than **Sunday, October 25, 2026, at 23:59 hrs.** via the designated assignment submission in Canvas.

Each question must be uploaded as a separate file in PDF format. Please use the following naming convention for each file: LastName_FirstName_StudentID_QuestionX.pdf
Failure to follow these guidelines may result in a grade penalty.

8 EXAMINATION

The examination of the module consists of the following assignment:

Assignments	Weight	Submission	Deadline
1 Group Presentation (in class)	25%	group	11.09.2026
2 Individual Essay	75%	individual	25.10.2026

Course assignments will only be graded if the following criteria are met:

- student is required to attend all sessions during the educational week. In the event that a student anticipates missing a session, the student must ask approval from both the MBA programme coordinator and the academic course coordinator in advance. Absence from more than one session, or a cumulative absence exceeding three hours, will automatically result in a fail. Please note that some sessions, such as those with a final presentation, are mandatory. Be sure to check this in advance.
- student submitted assignment(s) on deadline.

10.0	Outstanding
9.0	Very good
8.0	Good
7.0	More than satisfactory
6.0	Satisfactory
5.5	Pass
5.0	Almost satisfactory
4.0	Unsatisfactory
3.0	Very unsatisfactory
2.0	Poor
1.0	Very poor
0.0	Fail – Use is at the discretion of the Board of Examiners
Pass	≥5.5; performance at least meets the minimum criteria
Fail	<5.5; performance below the minimum criteria.

Grades are given on a scale from 0.0 to 10.0 in whole grades, half grades or a pass/fail or a No grade (NG). A grade as from 5.5 is considered sufficient.

In group assignments, fair participation and equal contributions by all members of the team are required. In case of non-participative behaviour, a “No Grade” will be assigned to the concerned student(s).

You will have the opportunity to review the grading of your assignment within 10 days of the publication of your final grade.

In case you either did not submit a final paper or failed to pass, you have the opportunity for a resit. However if you don't submit your assignment before the deadline you will receive a non-grade (NG).

In case you fail to pass the course after the first sit and second sit, we advise you to contact the MBA coordinator to discuss your options. In practice, this may mean that you need to participate again in the next edition of this course or in the educational unit that replaces this course.

9

TEACHING FACULTY

Prof. dr. Dennis Bams (PhD 1999, Maastricht) is Professor of Risk Management at Maastricht University. Dennis studied Econometrics at Erasmus University in Rotterdam and Actuarial Science at the University of Amsterdam. Subsequently, he pursued a PhD at Maastricht University, the University of Chicago, and *Ecole des Hautes Etudes en Sciences Sociales* in Marseille. From 1998 to 2015 he worked

as a practitioner in various risk management positions at ING, De Lage Landen and Philips Pension Fund. Currently, he is an external member of the Risk Committee of *Stichting Pensioenfondsen voor Huisartsen* and a Supervisory Board Member of *ASN Impact Investors*, where he is chair of the Audit Committee. Dennis is chairman of the National Risk Assessment Money Laundering and Terrorism Financing with the Ministry of Justice and WODC. His research interest focuses on Risk Management, Mutual Funds and Sustainable Finance. He has published in *Management Science*, *The Journal of Econometrics*, *Small Business Economics*, *International Journal of Forecasting*, *Journal of Empirical Finance*, *Journal of Derivatives*, *Journal of International Money and Finance*, *European Financial Management* and *International Review of Financial Analysis*.

Drs. Ton van Bree RA has worked for PwC Accountants B.V. in the Netherlands and the United States for almost 30 years until 2021. He is an auditor with extensive practice experience in accounting, auditing, corporate governance, IT and sustainability. The last 15 years of his career he was senior director, signing off on the financial statements of many multinational companies, predominantly production or IT-related. For 6 years now, Ton is also responsible for the Audit & Assurance curriculum of the post-master track for accounting students at MU. In 2021, Ton made a switch to a full-time career at MU as a tutor, lecturer and course coordinator. Moreover, he is involved in the UMIO programmes in the Netherlands and the FHR MBA programme in Surinam.

Prof. Dr. Harold Hassink RA is Professor of Auditing at Maastricht University. From 1984 until 1990 he studied business administration at Maastricht University. He graduated from the postgraduate program Chartered Accountant of Maastricht University in 1992. He is interested in various research areas in financial analysis and auditing, including earnings forecast quality and the professional ethics of auditors. His work has appeared in

the *Journal of Business Ethics*, *European Accounting Review*, *European Industrial Relations Review*, and in various German and Dutch accounting and auditing journals. Harold Hassink is the director of the postgraduate program controlling (EMFC and iEMFC).

Dr. Roger Otten is an Assistant Professor of Finance at Maastricht University in the Netherlands. His main research topics include Pension Funds, Mutual Fund Investments, Corporate Governance and Responsible Investing. His academic work has been published in various academic journals such as the Journal of Banking and Finance, European Financial Management, Managerial Finance, Accounting & Finance, Pacific Basin Finance Journal and Journal of Asset Management. He has been quoted in the popular press by the Financial Times, Wall Street Journal, Het Financieele Dagblad, NRC and Trouw, among others. He has extensive experience in teaching executive courses for, among others, the Amsterdam Institute of Finance (AIF), the Dutch Financial Analysts Association (VBA), the Amsterdam School of Real Estate (ASRE), the Dutch Actuarial Institute (AG) and the Maastricht University MBA programme. In 2005 he received the best teacher award at the Faculty of Economics and Business Administration of the University of Maastricht. He holds both a PhD and MSc in finance from Maastricht University.

Next to his academic affiliation, he is a Senior Policy Advisor Investments at ABP Pension fund in the Netherlands and a member of the Investment Committee of the Pension fund for the Dutch Dioceses (Bisdommen). Before that, he was an Investment Manager at Philips Pension Fund, a Senior Portfolio Manager at ING Investment Management, a researcher at ABP Investments (currently known as APG Investments) and an academic associate at FundPartners, an independent product development company for investment funds.

Dr. Paulo Rodrigues is an Assistant Professor of finance at the School of Business and Economics at Maastricht University. Paulo did his PhD in Econometrics at the Goethe University in Frankfurt. After that, he spent three years as a postdoc at the chair of derivatives and financial engineering at Goethe. Finally, he moved to Maastricht in May 2011 to start his position as an assistant professor. He was awarded tenure in June 2016. His research interests are mainly in, but not limited to, the field of asset pricing. A large part of his research has been concentrated on the empirical performance of continuous time models for equity returns. He is also interested in theoretical equilibrium asset pricing models, and derivative pricing theory.

Prof. Dr. Philip Vergauwen is Professor Strategic Management Accounting & Control at Maastricht University. He previously was dean of the Solvay Brussels School of Economics and Management (SBS-EM), Université libre de Bruxelles from 2018-2021 after a deanship at the Maastricht University School of Business & Economics (SBE-UM) (2013-2017) where he was also full professor Controlling, and Department Chair Accounting & Information Management, Director of the international Executive Master of Science of Finance and Control (iEMFC) of the Maastricht University until 2013. Philip has also been Member of the AACSB Board of Directors (2015-2017, 2020-21) and was previous to this board position Chairman of the AACSB European Advisory Council EMEA and member of the Continuous Improvement (Reaccreditation) Review Committee. He chairs the International Advisory Board (and is ex officio) Member of the Board of KEDGE (Bordeaux-Marseilles)

Business School, is Chair of the United Nations University – MERIT/UM and is member of the Deakin Business School (Deakin University, Australia) Advisory Board. His research focuses on the (behavioural) economics implications for management control (reward systems, intellectual capital approaches to performance measurement and management and on innovation and change (increasingly in the health, biotech, medtech and pharmaceutical sector).

10 GUEST SPEAKERS

Eric Lodder is a seasoned finance executive with extensive international experience, including his role as CFO of DSM Asia, based in Shanghai, from 2009 to 2022. Prior to that, he served, as CFO of DSM China and Vice President Finance for DSM Nutritional Products China. His expertise spans a broad range of areas, including financial strategy, organizational transformation, and international expansion. He has played a key role in multiple mergers and acquisitions, guiding complex cross-border transactions and overseeing post-deal integrations. Eric is recognized for his strategic mindset, cross-cultural competence, and ability to translate financial insights into meaningful business impact. During his tenure, he led finance teams through periods of significant growth, regulatory complexity, and post-pandemic transformation. His financial stewardship and strategic vision contributed to robust performance in a highly competitive and diverse regional market. Eric's engagement extends beyond finance into broader business leadership, including his role as board chairman in Shanghai. His deep understanding of Chinese cultural and corporate practices further enriches his perspective on global financial governance. He now acts as an engaging guest speaker, offering MBA participants practical insights into: Financial leadership and decision-making in international corporations; Challenges of finance in highly regulated and multicultural contexts; Strategic alignment of global operations with local market realities; Leading and navigating complex mergers and acquisitions in an international environment.

Drs. Enno Soeren RC is Director of Business Operations at the Limburg Regional Police Unit, where he leads both business operations and contributes to executive-level governance. He brings a unique combination of hard and soft skills to the public-sector domain. Trained as a business economist and certified controller (RC), he also holds qualifications in project management, ITIL, ISO, Lean, and digital transformation. Enno strongly believes that soft skills lead to hard results. His leadership approach is characterized by empathy and open communication, allowing him to achieve efficiency, cost savings, and organizational targets without losing sight of employee and stakeholder satisfaction. He has completed advanced programs in managerial psychology, change management (SIOO), and leadership in digital transformation. Previously, Enno served, among other roles, as Director of the Shared Service Center at the Municipality of Maastricht. He is actively involved in society as a board member of several foundations and associations, underlining his commitment to public service and responsible leadership. Enno also lectures in the field of Internal Control and Accounting Information Systems (ICAIS), IT Control and Audit, and Business Control. He teaches in post-master programs for both Chartered Accountants (RA) and Certified Controllers (RC), as well as in business control education more broadly.
